

CONSTRUCTION UPDATE – 9 JULY 2018

This notification is regarding work in the entry garden, with the installation of pre-cast panels for the new elevator.

What to expect:

We have a 130tonne truck on site to lift the panels into place. This will be located at the bottom of the Cornwallis Street driveway. The panels will be held on semi-trailers which will also be in the area (see below map for reference). We will need to park these in some of the parking spaces outside the IBC Building – temporary parking will be available for those affected. Please follow the traffic control for instruction.

The area will still be accessible for cars and pedestrians, with the exception of when a panel lift is occurring. All traffic will be asked to stop (max. 5 mins) while the lift takes place. The area will be under traffic control for the day so please take care and look for instruction.

In saying this, we would encourage you to please use the alternate route and follow Cornwallis St down to Locomotive Street for access to site during these days.

Work duration:

This work will take place over 3 days being 10th, 13th and 17th July (for these individual days and not the period in between). Works will be completed during our standard construction hours, 7:30am to 5:30pm.

If you have any questions or concerns, or if you require more information, please contact me at atp.communications@mirvac.com or call 1800 870 549.

Kind regards, Kim
